WIRELESS NURSE CALL ALARM AND MONITORING SYSTEM

Nurse Call System

Nurse Call Systems provide a variety of functions, an attractive design, are durable, and affordable. They use a dedicated backbone bus, and are fully scalable for large buildings. Nurse calls allow the flexibility to include wireless receivers for mobile alarm location, door monitors, and bed exit monitors. System components include:

Basic Components

- Main Panel (MP-01) for system
- Floor Controller Junction (FCJ-01) for each floor
- Wired Multi-Colored Light junction unit (WRDMCL-01)
- Wired Call Point (WRDCP-02) with emergency call, nurse presence, guard, and reset buttons
- Wired Call Point for toilet (WRDCP-01) with reset button (WRDCPR-01)
- Nurse call Extension Cord (NEC-02)
- Intercom Care Station (ICS-01) for desktop

Optional

- Door Monitor Strips for wandering prevention (DMS-02)
- Wristband alarm transmitters (TXP-02) for mobile patients
- Processors and receivers for mobile alarm location (PU-01 and ERX-01)
- Nurse call database with site mimic (EASPC)
- Universal POCSAG controller for pagers and floor displays (UPD-01)

Appropriate for a Variety of Uses

- Bed monitoring for fall management
- Door monitoring for dementia patients
- Nurse call for medical facilities
- Emergency call
- Service call
- Mobile emergency call
- Asset tracking
- Bathroom / Disabled Alarm
